# Aastha Lakhanpal

## Frontend Developer(React)

### PROFESSIONAL SUMMARY

Driven Front-end Developer with a solid understanding of web technologies such as JavaScript, React and Redux. Demonstrates strong problem-solving abilities and a fast learning curve. Committed to delivering high-quality, responsive user interfaces while continuously improving technical skills and collaboration.

### PROJECTS

#### 1. StoryCraft - Collaborative Storytelling Platform

React | Redux | Firebase | Chakra UI

- Built a real-time collaborative storytelling app using React, Redux, and Firebase.
- Designed a sleek, responsive UI with Tailwind CSS, Chakra UI, and Framer Motion.
- Implemented authentication, protected routes, and async state management with Redux Thunk & Firebase Auth.

#### 2. Trendify - Fashion E-Commerce Website

JavaScript | HTML5 | CSS3 | RESTful APIs |  
JSON server

- Developed a responsive web application using JavaScript, HTML5, and CSS3 to discover trends in fashion and lifestyle.
- Implemented user authentication and interactive UI elements to enhance user engagement.
- Integrated JSON-Server to handle dynamic content rendering and support full CRUD operations.
- Optimized website performance for seamless real-time updates and smooth user experience.
- Applied responsive design principles to ensure compatibility across various devices and browsers.
