PROFESSIONAL SUMMARY

Driven Front-end Developer with a solid understanding of web technologies such as JavaScript, React, and Redux. Demonstrates strong problem-solving abilities and a fast learning curve. Committed to delivering high-quality, responsive user interfaces while continuously improving technical skills and collaboration.

PROJECTS

1. Weatherly | |

React | Tailwind CSS | Vercel

- Built a dynamic weather application providing real-time weather updates with a seamless city search feature.
- Designed a fully responsive UI using Tailwind CSS and deployed it on Vercel for smooth performance.

2. Trendify - Fashion E-Commerce Website | |

JavaScript | HTML5 | CSS3 | RESTful APIs |
JSON server

- Developed a responsive e-commerce website with real-time product data and full CRUD functionality.
- Implemented search, filters, and error handling for an enhanced user experience.

3. StoryCraft - Collaborative Storytelling Platform | |

React | Redux | Firebase | Chakra UI

- Created a real-time collaborative storytelling platform with Firebase authentication and Redux state management.
- Designed an intuitive and responsive UI with Chakra UI for a seamless user experience.

4. Digital Clock | |

JavaScript | HTML5 | CSS3

- Designed a dynamic digital clock with real-time updates.
- Implemented smooth transitions between different time formats.

5. Drum Kit | |

HTML5 | CSS3 | JavaScript

- Developed an interactive drum kit that plays sounds when specific keys are pressed on a keyboard.
- Designed for desktop use, ensuring accurate sound mapping for each key.
