📇 PROFESSIONAL SUMMARY

Highly adaptable Frontend Developer skilled in React.js, JavaScript, HTML, and CSS with a keen ability to implement responsive designs and optimize application performance. Proficient in integrating front-end components with APIs and leveraging Generative AI for innovative solutions. Rapidly acquires new technologies to enhance user experiences.

🖥 PROJECTS

1. Weatherly | ⊕ | ⦿
React | Tailwind CSS | Vercel

- Developed a weather app using React and Tailwind CSS with deployment on Vercel.
- Implemented responsive design to ensure app works across different devices and browsers.
- Integrated weather API for real-time, dynamic data display.
- Focused on performant and scalable code to enhance user experience.

2. StoryCraft - Collaborative Storytelling Platform | ⊕ | ⦿
React | Redux | Firebase | Chakra UI

- Built a real-time collaborative storytelling app using React, Redux, and Firebase.
- Designed a sleek and responsive UI using Chakra UI and Framer Motion.
- Implemented authentication and protected routes with Redux Thunk & Firebase Auth.
- Enhanced cross-platform compatibility and integrated external services efficiently.

3. Trendify - Fashion E-Commerce Website | ⊕ | ⦿
JavaScript | HTML5 | CSS3 | RESTful APIs | JSON server

- Created a responsive e-commerce web app using JavaScript, HTML5, CSS3, and RESTful APIs.
- Implemented dynamic data handling with JSON server for CRUD functionality.
- Enhanced user experience with search features, filters, and comprehensive error handling.
- Focused on cross-browser compatibility and seamless frontend-backend integration.
